# AI Tool Selection Guide for Engineering Work

Choose the right tool for each task type

## Chat Interfaces (Claude.ai, ChatGPT, Gemini)

Q&A and drafting
Projects and files
Search, code, images
Brainstorming

*Flexible, conversational*
*Good for exploration*
*Easy to iterate*

## NotebookLM (Google)

Research synthesis
Source−grounded answers
Podcast generation
Multi−document analysis

*Cites sources directly*
*Reduces hallucination*
*Great for learning*

## Coding Agents (Claude Code, etc.)

Multi−step tasks
File operations
Runs code and tests
Technical implementation

*Edits real files*
*Runs commands*
*Project−aware context*

## Browser Extensions (Claude, etc.)

Web page analysis
Quick questions
Content summarization
In−context assistance

*Works in browser*
*No context switching*
*Immediate access*
