

Industry 4.0 Plant Layout Considerations

New infrastructure requirements for smart manufacturing

**AGV
Routes**

Floor markings,
charging stations,
traffic management

**5G/WiFi
Coverage**

Network infrastructure
for IoT sensors,
real-time data

**Edge
Computing**

Local processing
near machines,
low latency

**Digital
Twin**

Virtual replica
of physical plant,
live updates

**Cobot
Zones**

Safety zones,
human-robot
collaboration

**AR/VR
Stations**

Training, maintenance
guidance, remote
assistance
