

The Four Steps of Effective AI Collaboration

A systematic approach to getting maximum value from AI tools

1. DEFINE the Task

Break complex problems into AI-manageable tasks.
Identify what you need and what AI can help with.

→ Task decomposition

2. PROMPT with Context

Write structured prompts using the seven rules.
Include role, context, constraints, and deliverables.

→ Prompt engineering

3. ITERATE and Refine

Review AI output critically.
Ask follow-up questions.
Refine through multiple conversation turns.

→ Multi-turn dialogue

4. VALIDATE and Apply

Verify accuracy against standards and expertise.
Apply human judgment.
Integrate into final work.

→ Critical evaluation
