

Industry 4.0 Plant Layout Considerations

New infrastructure requirements for smart manufacturing

AGV Routes

Floor markings,
charging stations,
traffic management

5G/WiFi Coverage

Network infrastructure
for IoT sensors,
real-time data

Edge Computing

Local processing
near machines,
low latency

Digital Twin

Virtual replica
of physical plant,
live updates

Cobot Zones

Safety zones,
human-robot
collaboration

AR/VR Stations

Training, maintenance
guidance, remote
assistance
